

Middle Valley Rework

Documentation

- In starting documentation found problems with data in DSS
 - The reduction in ET rate to actual ET for model was not incorporated. Will incorporate in model.
 - Calibration changes in deep ground water heads for Cochiti to San Felipe not incorporated. Change made to DSS
 - Calibration change in deep ground water heads in San Acacia to San Marcial reach not incorporated. Change to be made in DSS.

Documentation

- Documentation is expansion of the current Middle Valley documentation to be more complete in the methods used for each object
- Documentation incorporates the technical memos that document ET calculations
- First draft to be completed by September 30

Future Work

- Complete documentation
- Further investigation of reach from Central to San Acacia.
